Thanks Greg. I've got our START chemist, Ex. 4 - CBI and hydro, Ex. 4 - CBI on board to be able to call in. I also have an open conference call line that we can use anytime. As soon as we get a time confirmed I'll email everyone the conference call number.

A call later today would be good. I may still be onsite. I will call you before 3:30 to confirm a time.

Thanks for the call and all the info Greg. I'm going to take a look at everything and get all of this to our chemist, hydro, and the person who will be taking the lead on the sampling next week to review as well. If I can get everyone coordinated, would you want to have a conference call later this afternoon? Maybe around 3:30 or 4? Let me know, please.

Then, we'll get cracking on a HASP and sampling plan either later today or first thing Monday morning, if that's ok with you.

Thanks,

Ex. 4 - CBI

Subject: Chemicals in plant

Jason,

Most of our chemicals are the alpha-beta terpene copolymer.

Other chemicals in the plant are:

Mono and Di ammonium phosphate
Mono potassium phosphate
Urea
Ammonium and Potassium phosphate
EDTA chelated with either Calcium, Zinc, Manganese, or free nonchelated EDTA
Iron EDDHA – an iron chelate that's easily soluble and colors the water red
Liquid Tint Patent B – Blue dye in our dry fertilizers
Seaweed and seaplant extracts
Amino Acid Liquids

Thanks,
Matt Nelson
